**WAYS TO
CREATE
A SAFER
WORKPLACE**

**SOLUTIONS
TO SUIT
YOUR NEEDS**

1

PROTECT YOUR PEOPLE

The safety of your employees is paramount. Workplace accidents can range from minor injuries to severe incidents, impacting both the well-being of your staff and the productivity of your operations. Common issues include slips, trips, and falls, collisions with moving vehicles, and injuries from improper handling of materials.

IFLEX PEDESTRIAN 3 RAIL BARRIER

CONTROL ACCESS POINTS

Ensuring controlled access points with gates and barriers can help manage the flow of people and vehicles, reducing the risk of accidents.

TRAFFIC GATE

SWING GATE

SEGREGATE AND GUIDE STAFF

It is crucial to segregate high-risk areas to ensure the safe movement of staff and goods. Properly marked pathways with barriers can help guide employees safely through the workplace.

PADDED COLUMN GUARD

2

PROTECT YOUR BUILDINGS AND INFRASTRUCTURE

Vehicle impacts can cause significant damage to buildings, leading to costly downtime and repairs. Damage to structural elements such as columns, walls, doorways, stairs, and pipes can disrupt operations and pose safety hazards.

FLEXISHIELD COLUMN GUARD

BUILDING PROTECTION

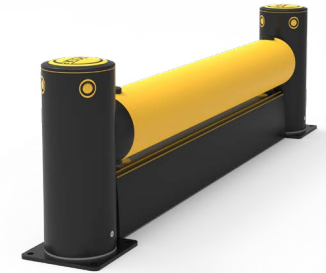

Protecting structural elements from vehicle impacts is essential to maintain the integrity of the building and avoid expensive repairs. Damage to critical infrastructure can also lead to safety risks and operational delays.

FLEXISHIELD COLUMN GUARD

IFLEX SINGLE TRAFFIC BARRIER WITH FORKGUARD

EV CHARGING PORTS AND SERVICE YARD DOCKS

Specialised areas like EV charging ports and service yard docks are particularly vulnerable to damage from vehicle impacts. Protecting these areas is important to ensure they remain operational and safe for use.

TRAFFIC GATE

3

PROTECT YOUR RACKING

Racking systems are essential for storage but are vulnerable to vehicle impacts, which can lead to significant damage and potential collapse. This poses risks to employee safety and can result in the loss of inventory and costly repairs.

IFLEX SINGLE RACKEND BARRIER

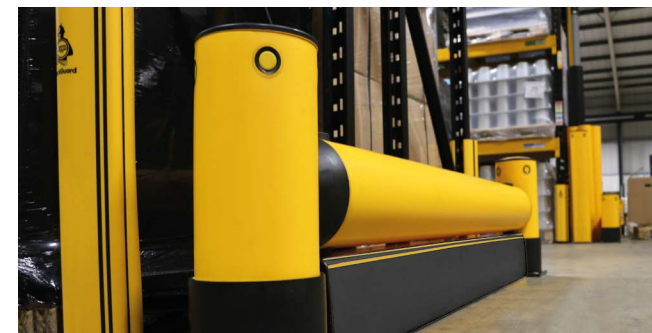

RACKGUARD

IMPACT ABSORPTION

Racking systems need to be designed to absorb and deflect impacts to maintain their structural integrity. Collapsed racking can cause serious injuries and disrupt warehouse operations.

PROTECT YOUR MACHINERY

Machinery represents a significant investment, and protecting it from damage is essential to maintain operational efficiency. Damage to machinery can lead to substantial downtime, halting production and incurring high repair costs.

STEP GUARD

PROTECT YOUR INVESTMENTS

With machinery being a huge expense, any damage could cause chaos to your operation. The right solution will keep your operation running smoothly.

YOUR PROBLEM, OUR SOLUTION

WHO IS A-SAFE

A-SAFE's polymer safety solutions protect your people, assets and infrastructure, saving lives, reducing operational costs and boosting efficiency.

We are the world-leading polymer safety barrier manufacturer. Our safety solutions are engineered to provide enhanced protection for a range of industries including airports, food & beverage, pharmaceutical and logistics.

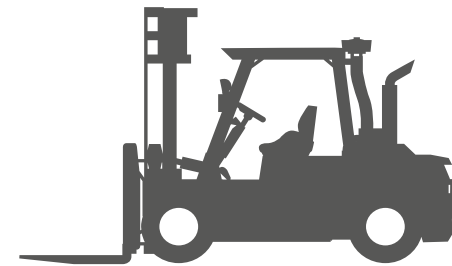

THE A-SAFE DIFFERENCE

A-SAFE has been pioneering polymer solutions for 40 years. Throughout that time, we've worked closely with our customers to understand their needs and work collaboratively to find the best solution to any problem.

Addressing your specific safety challenges is our priority. We provide comprehensive solutions tailored to your needs, ensuring that every aspect of your facility is protected.

SITE SAFETY AUDIT

A detailed site survey is conducted to understand your operations, identify potential risks and propose solutions to improve safety and increase operational efficiency.

UNDERSTAND YOUR PROBLEMS

By considering factors like traffic flow, vehicle types, turning points, and impact angles, we recommend the most appropriate protective measures.

FIT FOR PURPOSE SOLUTION

Based on the site survey data, we specify tailored solutions that are fit for purpose, ensuring maximum protection for your facility.

PAS13

CERTIFICATION

We provide full transparency of product performance with testing reports and independent certification to verify test accuracy.

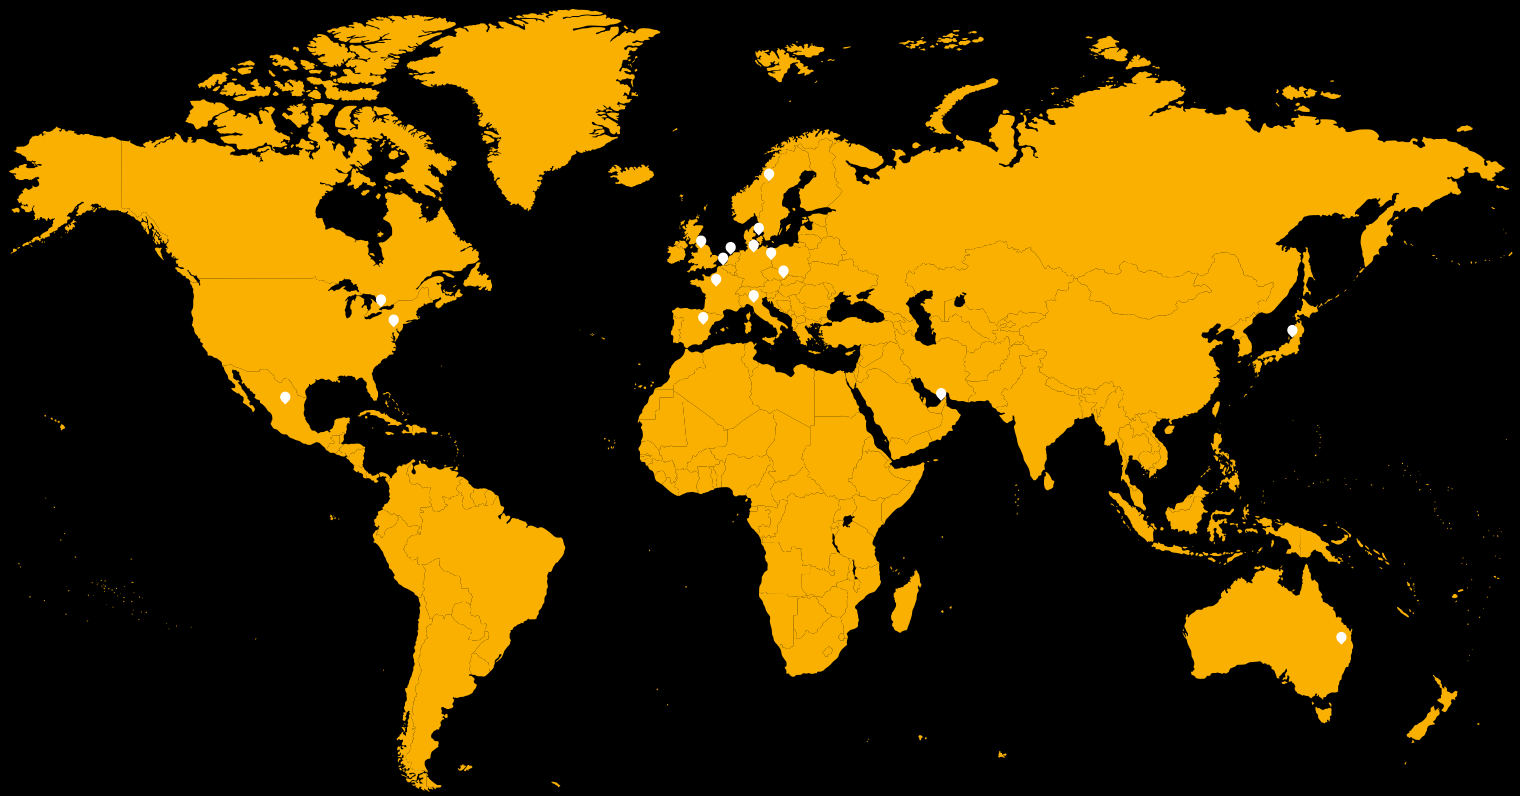

RETURN ON INVESTMENT

A-SAFE barriers are engineered to flex and return to their original position, allowing them to take repeat impacts. This will save you money on repairs, reduces downtime and boosts operational efficiency.
