MACHINERY DIVISION

Who We are

Abdullah Hashim Machinery Division (AHM) is a prominent provider of high-quality industrial machinery and equipment in Saudi Arabia. With a diverse portfolio that includes products for sectors such as construction, mining, and energy, AHM offers cutting-edge solutions through strategic partnerships with global brands like Yanmar. The division is committed to delivering reliable, high-performance machinery, backed by comprehensive support services and technical expertise.

Aligned with Saudi Vision 2030, AHM plays an essential role in advancing the kingdom's industrial and infrastructure development. By offering world-class machinery and services, AHM contributes to the realization of Vision 2030's goals of diversifying the economy, enhancing the private sector's contribution, and boosting industrial growth. Through innovation, sustainable practices, and a focus on workforce development, AHM supports key projects that drive Saudi Arabia's long-term growth and economic transformation.

MACHINERY DIVISION

Stemming from his fascination with factories, Mr Abdullah Hashim's dealing in machinery started as early as the 1950s. Since then, the Abdullah Hashim machinery business has grown to become a solution provider for power products, water management, air compressors, material handling equipment, marine engines, and agricultural tractors.

AHCL supplies machinery for a wide variety of applications, serving various industries such as building & road construction, warehousing, mining, agriculture, and marine, to name a few.

AHCL develop relationships with first-class international brands and is now the distributor of 10 premium brands.

Yale Materials Handling Corporation is one of the oldest manufacturers of lift trucks in the world. We've been in the business of lifting since 1875 and we apply that experience to help customers solve materials handling challenges. Our full line trucks range in capacity from 1 to 16 tonne and are powered by internal combustion engines or electric options.

Yale also offers robotic solutions, telemetry, fleet management, parts, financing and training. From traditional lift truck equipment to emerging technologies, our goal, everyday, is to work with our nationwide dealer network to continually improve and provide the solutions you need, when and how you need them.

Yale Independent Dealer Network

A DEDICATED PARTNER, WITH EXPERT SUPPORT & SOLUTIONS

We know that dealer support is critical for uptime and productivity. That's why our dealer are intentionally independent. Their success depends on your success, so they're focussed on understanding your business and are dedicated to providing the support and solutions you need. By partnering with a Yale dealer, you're not just getting lift truck, you're getting a dedicated partner in your success.

Take operator awareness to a new level with Yale Reliant

AUTOMATE YOUR WAY OUT OF THE LABOUR CRISIS

Despite global productivity and labour challenges, you're expected to get orders out the door on time, every time. We understand that this puts huge pressure on your operators and productivity schedules. That's why we launched Yale Reliant, a smart system that helps improve safety in your warehouse whilst allowing the operator to remain in control.

Advance Dynamic Stability adjusts travel speed and smooths forklift and tilt movement to help maintain stability and minimise the potential for tip overs.

Collision Avoidance Assist reduces the speed of the truck if objects or pedestrians are in close proximity and within the path of travel, to help avoid collisions.

Location-Based Assist Leverages RTLS to allow you to set custom rules in your warehouses to improve safety and productivity.
